Education

Kalinga Institute of Industrial Technology (KIIT), Bhubaneswar

B.Tech in Computer Science and Engineering

2021 - 2025

8.29 CGPA

Experience

Capgemini

July 2025 – Present

Software Engineer

Bengaluru

- Developed backend components for an **LLM-powered resume evaluation and generation platform** supporting automated candidate profile analysis workflows.
- Built data ingestion pipelines to process resumes and job descriptions into **structured formats** for downstream AI evaluation systems.
- Implemented a **RAG-based retrieval pipeline** using semantic search to improve contextual relevance and response accuracy.
- Integrated **LLM APIs** with configurable backend logic to support rule-based resume evaluation and generation workflows.
- Designed backend workflows for handling **unstructured data processing**, template rendering, and multi-format document orchestration.
- Collaborated across backend and AI workflows to improve processing reliability, debugging efficiency, and end-to-end system performance.
- Worked with Git-based workflows, REST APIs, Linux-based development environments, and structured debugging practices during feature development.

Projects

Kampus Eats:- [LINK](#)

- Engineered a food ordering platform aggregating data from **20+ campus food courts**.
- Built structured data flows for menu, rating, and location data across **200+ food items** using mock APIs.
- Implemented centralized state management and reusable UI components to support concurrent user interactions.

Kiit-EduDiary: Blog App [LINK](#)

- Developed a full-stack blog platform supporting **user authentication** and complete **CRUD operations**.
- Built and integrated **10+ RESTful APIs** enabling structured communication between frontend and backend services.
- Designed modular application components and scalable workflows to support maintainability and future feature expansion.

Technical Skills

Languages: C++, JavaScript, Python, SQL

Frameworks: React.js, Node.js, Express.js, Tailwind CSS

AI/LLM: LLM APIs, Prompt Engineering, RAG, Semantic Search

Tools & Platforms: Git, GitHub, Postman, Linux, Docker (Basics)

Databases: MySQL

Achievements / Leadership

Secured 2nd prize and won Prize money at the KIIT FEST Annual Coding Competition, an event focusing on debugging and updating code.

Awarded 3rd prize for excellence Performance in MLSA Coding Activity.

Served as a volunteer teacher at KISS, mentoring over 100+ tribal students by implementing hands-on learning strategies and teamwork through creative activities.
